Re: NPDES Permit #MA 000 1147

Dear Sir/Madam:

Please find enclosed the NPDES Discharge Monitoring Report Forms for Solutia Inc., Indian Orchard, for the third quarter 2020 wet weather sampling. Also enclosed is the current Delegation of Authority for the signing of water program documents.

* Per NPDES Permit No. MA0001147, Part I.A.5 (Wet Weather Monitoring of Outfalls), Footnote 5: Sampling frequency of quarterly is defined as the sampling of one (1) storm event (as defined in Footnote 2 in permit) in each quarter. Quarters are defined as the interval of time between the months of: January through March, inclusive; April through June, inclusive; July through September, inclusive; and October through December, inclusive. Yearly sampling shall be collected from the same storm event in August, as described in footnote 7 in permit. During that quarter, quarterly sampling shall be performed concurrently with the yearly monitoring event.

* Per NPDES Permit No. MA0001147, Part I.A.1 (Dry Weather Monitoring of Outfall 009), Footnote 1: Monitoring is only required March–November, inclusive. This is based on the unsafe conditions associated with access to the sampling location via steep slopes, sampling is not required during the winter months.

* Per NPDES Permit No. MA0001147, Part I.A.3 (Dry Weather Monitoring of Outfall 017), Footnote 7: Monitoring frequency shall be 1/Month for December–February, inclusive. During the months of March–November, monitoring frequency shall be 3/Month.

If you have any questions regarding this report, please contact Andrew Orciari at 413-730-3291.

Sincerely,

Shawn Pace
Site Manager
